

USGBC Northeast FL Innovation Forum

Smart and Sustainable Cities and Buildings

Presented by

Michael Hess, PE, LEED Fellow

Vice President, Smart & Sustainable Buildings

Panasonic Enterprise Solutions Company

This session will focus on some of the technology trends associated with smart and sustainable cities and buildings, and how they interact together, by utilizing two case studies. The first case study is the Fujisawa Smart Sustainable town, which is a 1000 home community in Japan. The second case study will be Pena Station NEXT, a 400 acre mixed use development that serves as a living smart / sustainable lab for the city of Denver.
